

Cyclistic: Strategic Growth

Converting Casual Riders into Long-Term Annual Members.
Data-Driven Insights for the Executive Marketing Team.

Executive Summary

The Commuter vs. Explorer

Our analysis reveals a sharp divide: **Members** prioritize efficiency and utility, while **Casual riders** focus on recreation and experience. This behavioral split is the key to our conversion strategy.

The Conversion Opportunity

By targeting high-duration riders in leisure hotspots during peak seasons, we can demonstrate the financial value of a membership, specifically addressing the 34.3% of casuals with "membership-like" habits.

Defining the Challenge

Lily Moreno, Director of Marketing, aims to maximize annual memberships. Our strategic analysis covers three core questions:

- ✓ How do behavior patterns differ between annual members and casual riders?
- ✓ Why would a casual rider purchase a Cyclistic annual membership?
- ✓ How can digital media influence casual riders to convert?

Data Methodology

Process

Calculated ride lengths & days of week. Removed outliers & errors.

Share

Actionable insights derived for executive decision making.

Prepare

5.7M+ rows cleaned in BigQuery. 12 months of historical data.

Analyze

Aggregation by user type, time, and geospatial coordinates.

Weekly Usage: Utility vs. Leisure

Insight: Members dominate the work week (Utility), while Casual riders peak on weekends (Recreation).

Hourly Activity: The Commute Peaks

Members showcase a clear Bimodal Peak (traditional commute hours), whereas Casual riders scale gradually up to 17:00

Seasonal Trends: Winter Resilience

Resilience vs. Dependency

Members: Maintain high consistency during Winter (Dec-Feb).
Usage is weather-resistant (Necessity).

Casual: Volume drops significantly in Winter, but explodes in Summer (June-Aug), reaching 42.4% of total fleet usage.

Winter (Member %)

82.1% Share

Summer (Casual %)

42.4% Share

Race Duration: Member vs. Casual Visual Split

Member

Member	Race duration	Casual
75.7%	1. Short (0-15 min)	60.8%
18.8%	2. Medium (15-30 min)	23.7%
4.8%	3. Long (30-60 min)	10.6%
0.7%	4. Very Long (60+ min)	5.0%

Casual

Spatial Analysis: Leisure Hotspots

Navy Pier

#1 Start & End Station for Casual Riders with 32k+ departures.

Millennium Park

Key Tourist Hub. Over 18.6k total weekend trip origins.

Shedd Aquarium

High point of leisure traffic with over 16.5k departures.

The Conversion Opportunity

39.3%

The "High-Value" Target

A significant 39.3% of Casual riders already exceed the 15-minute mark per single ride. For these users, the cumulative Pay-per-Minute cost easily passes the threshold of an Annual Membership.

Strategic Lead: Focus on "Cost Savings" messaging at the point of docking for these specific durations.

Recommendations for Success

-  **Peak-Timing Campaigns:** Launch digital media at 11:30 AM on weekends to catch casuals before they unlock.
-  **Geofenced Hotspots:** Target Navy Pier and Millennium Park with physical and digital conversion offers.
-  **Value-First Messaging:** Use post-ride notifications showing "How much you could have saved" for rides over 15 minutes.
-  **E-Bike Premium:** Incentivize conversion with "Electric minute bonuses" for new annual members.
